Professional Summary

.NET Developer | C# | ASP.NET Core | SQL | Entity Framework

Experienced .NET Developer with 7+ years in software engineering, specializing in C#, ASP.NET Core, Entity Framework, and SQL Server. Skilled in designing scalable APIs, optimizing performance, and improving CI/CD pipelines.

Professional Experience

Career Break

Career Break

Lithuania

December 2023 - Present

- After being laid off due to a project shortage, I relocated to Lithuania for a year, where I continued my job search and focused on transitioning into .NET development. Completed training, certifications, and hands-on projects in C#, ASP.NET Core, and SQL. In May 2025, I returned to Turkey and continue my professional development while actively seeking .NET developer roles.

Magic Media

Software Engineer (Unity/C#)

Remote

July 2022 - December 2023

- Contributed to a small RESTful API integration project using C#, applying clean code principles and modular architecture.
- Worked on the game Stranded Deep bugfixes and feature development, and an endless runner game as part of backend logic improvements.
- Collaborated with cross-functional teams in developing gameplay mechanics, gaining experience in agile workflows.
- Resolved issues in existing CI/CD pipelines to maintain a smooth development workflow.

Sarente Information Technologies

Software Engineer (Unity/C#)

Ankara, AN, Turkey

August 2021 - June 2022

- Developed core system logic for a gamified platform, implementing point tracking, save/load systems, and test modules in C# (Unity).
- Built structured and modular code integrated into larger backend systems.
- Collaborated with team members to integrate client-side features with backend functionality, improving overall system stability.

DVM Technology Incorporated

Software Engineer (Unity/C#)

Ankara, AN, Turkey

May 2021 - August 2021

- Developed a multi-user interactive environment with user profile customization, backend data handling, and dynamic content rendering using C# (Unity).
- Implemented client-server communication modules, ensuring smooth synchronization and reliable data flow. Ensured seamless user experience by resolving backend performance issues.

Gempa Electro-mechanical Engineering

Software Engineer

Ankara, AN, Turkey

September 2019 - April 2021

- Developed sensor-integrated systems using C/C++ and Arduino for laser rangefinder projects.
- Built desktop tools and system interfaces to support internal diagnostics and control systems.

ARINLABS - Artificial Intelligence Labs

Software Engineer

Ankara, AN, Turkey

October 2018 - May 2019

- Developed embedded software for defense industry devices using C#.
- Implemented communication protocols (UART, SPI, I2C) and backend logic for GPS-enabled systems.

Kuasar Information Technologies

Unity Developer

Ankara, AN, Turkey

August 2016 - April 2018

- Developed interactive applications using C# and Unity for public institutions. Collaborated with teams to deliver robust and maintainable software.

Infopark Information Technologies*Software Specialist & System Support Engineer***Ankara, AN, Turkey***March 2015 - August 2016*

- Developed enterprise web applications using ASP.NET and C# with n-tier architecture.
 - Managed SQL Server setup, configuration, and maintenance alongside application deployments.
 - Participated in full SDLC: requirements, design, coding, and testing.
-

Education**Çankaya University***Bachelor's, Computer Engineering***September 2008 - July 2013**

Certifications

- **IBM Full Stack Software Developer** – Coursera, IBM (Earned December 2024)
<https://www.coursera.org/account/accomplishments/specialization/YQZYKRYGO131>
 - **Microsoft Full-Stack Developer** - Coursera, Microsoft (In Progress)
 - **ASP.NET Core Deep-Dive in .NET 9** – Udemy
-

Skills**Languages & Frameworks:** C#, .NET, ASP.NET, ASP.NET Core, Entity Framework, JavaScript, HTML/CSS**Tools & Platforms:** Git, Visual Studio, Postman, SQL Server, Unity**Practices:** Agile, Scrum, REST APIs, CI/CD
